

## Versatile and Rich Options for Flatbed Digital Inkjet Printing

Available Models:

**HT1610UV**

UV Flatbed Inkjet Printer

Small format, lightweight, economical

**HT3020UV**

UV Flatbed Inkjet Printer

Ultra-large format width-to-length ratio, enhancing printing capacity

**HT2512UV**

UV Flatbed Inkjet Printer

Classic for a decade, showcasing stable quality

**HT3116UV**

UV Flatbed Inkjet Printer

Best-selling in overseas markets, large format high-speed flatbed solution

**HTH2512UV**

UV Flatbed Inkjet Printer

High-level UV Inkjet Printing Solution

**HT3113UV**

UV Flatbed Inkjet Printer

Expanding large-format applications in home and building materials

\*Illustration purpose

(\*Multiple Configuration Options Available for all Models)

Characteristics of Kyocera Series	Characteristics of Ricoh Series
<ul style="list-style-type: none"> <li>Overall reduction in printhead usage</li> </ul> <p>Kyocera single printhead can achieve a printing width of 108 - 112 mm. Achieve high-quality printing with fewer Printheads, reducing the difficulty and time of printhead stitching.</p>	<ul style="list-style-type: none"> <li>High Productivity: More efficiency, faster delivery, shorter cycles</li> </ul> <p>Max. droplet ignition frequency of 50KHz, an 80% increase in ink discharge per unit time, meeting high-speed production needs. Save twice the printing time under the same resolution printing mode.</p>
<ul style="list-style-type: none"> <li>Compatible with high productivity and high quality</li> </ul> <p>High productivity can be achieved even in high-resolution image printing.</p>	<ul style="list-style-type: none"> <li>High Resolution: Realistic images, textures, details</li> </ul> <p>Minimum droplet size reduced from 7pl to 5pl, achieving higher jetting accuracy. Achieve smoother, more delicate printing effects without generating a grainy texture.</p>
<ul style="list-style-type: none"> <li>Implementation of multi-level grayscale printing</li> </ul> <p>Small droplets are suitable for high Resolution images. Large droplets make colors more vibrant. Combination of multi-level droplets results in a subtle and natural color gradient.</p>	<ul style="list-style-type: none"> <li>Enhanced ink compatibility, extending the lifespan</li> </ul> <p>Each print Printhead has enhanced bonding technology to improve durability. Further enhances compatibility between the Printhead and UV ink.</p>
<ul style="list-style-type: none"> <li>Suitable for high reliability in demanding industrial environments</li> </ul> <p>Stainless steel printhead panel and metal shell. Widely used in various fields with numerous successful cases and proven performance.</p>	

### Outstanding Performance of HandTop UV Flatbed Inkjet Printer

<ul style="list-style-type: none"> <li>Automatic Negative Pressure System</li> </ul> <p>Automatically controls negative pressure, achieving precise software visualization and setting of negative pressure parameters.</p>	<ul style="list-style-type: none"> <li>Adjustable UV Curing Power</li> </ul> <p>LED light power can be adjusted for better curing effects.</p>
<ul style="list-style-type: none"> <li>Automatic Height Measurement System</li> </ul> <p>Can measure heights of up to 100mm for media, automatically detecting printing height.</p>	<ul style="list-style-type: none"> <li>Sensitive Collision Avoidance Device for the Carriage</li> </ul> <p>The carriage is equipped with a collision avoidance emergency stop device to prevent accidental scraping that may damage the printhead.</p>
<ul style="list-style-type: none"> <li>Adjustable Suction Area</li> </ul> <p>The suction area can be adjusted according to actual conditions, supporting both suction and blowing adjustments to simplify media loading and unloading.</p>	<ul style="list-style-type: none"> <li>Optional Anti-Static Bar</li> </ul> <p>The anti-static bar kit can remove static electricity from the media surface, significantly reducing ink mist and improving printing quality.</p>
<ul style="list-style-type: none"> <li>Integrated Software Functions (Require ADP / Computer)</li> </ul> <p>Allows users to adjust all functions within the software, enabling RIP and printing simultaneously to enhance work efficiency.</p>	<ul style="list-style-type: none"> <li>High-Quality Original Imported Components</li> </ul> <p>Components are sourced from top global suppliers in Japan, Germany, Italy, etc.</p>
